SESSION SUMMARY

25 JULY 1986

There seemed to be a lot of "noise" and confusion with today's session. I seemed to have been having trouble identifying one, overall gestalt for each site. I am not sure whether I'm having trouble locking onto the signal or that I'm receiving too much signal. I am still not comfortable with the ideograms. They all seem to be the same. I realize that the ideogram is not a graphic representation of the site, but I would expect to see enough difference to establish a definite pattern for the different gestalts.
